Re : Pension System/Windows Beta Testing & Investment Link Survey

Investment Link Survey:

In order to determine which DATAIR-provided investment interfaces (i.e.: Nationwide, Manulife, etc.) will be supported for the Windows Pension System, we ask that all clients who currently use one or more of these links complete a very brief survey on our web site. The survey may be accessed by going to <http://www.datair.com> and entering the code 'SURVEY' in the Web+ Code field on the upper left side of the home page.

If the results of the survey indicate certain links are no longer used, support for them may be dropped for both the Windows and DOS systems, therefore it is important that you identify any of them that you use.

Please complete this survey even if you do not wish to be a beta test site.

Beta Testing Applications:

We are currently seeking 10 to 15 clients that are willing to serve as Beta Test Sites for the Windows version of the Defined Contribution PE/Win system. We expect the beta testing to begin in June.

The selected sites will receive pre-release versions of the software and be expected to install, use, and provide feedback on the system to us on an ongoing basis during the beta test period.

To learn more about being a beta test site and to apply, please visit our web site at <http://www.datair.com> and enter the code "BETA" in the Web+ Code field in the upper left side of the page.

Applications to be a beta site must be received no later than Monday May 31, 2004.
