Westmont, IL. - DATAIR Employee Benefit Systems, Inc. announces the release of its *Pension Reporter* software package containing 2002 plan year EFAST-approved 5500 series forms and schedules and the 2003 PBGC Form 1-ES. Due to the unusually early release by the government of this year's form specifications, DATAIR's system developers were able to complete the programming and testing of *Pension Reporter* six weeks ahead of last year's schedule. This is a complete release with all printing capabilities, validity checking and built-in instructions.

The *Pension Reporter* system is licensed by DATAIR to Third Party Administrators, Consultants, Plan Sponsors and other pension and benefits professionals on a site basis (no limits to number of computers) with license and support fees being based on the number of plans administered.

DATAIR's Pension Reporter is available in three modules:
- **5500 Series** (including all forms, schedules and SAR),
- **1099-R Series** (including electronic transmittal), and
- **Qualification & Termination** (5300 and 5310 Series).

The system includes government instructions, detailed instant edit checks, year-to-year data transfer, conversions from other systems, and batch printing. Licensees are entitled to expert support on systems and forms issues at no additional cost.

DATAIR, founded in 1967, has been a leading provider of software for benefits and pension professionals. In the early 1980s, DATAIR was the first software developer to introduce a system for generating the government Form 5500 series and schedules. Additional information about *Pension Reporter* and other DATAIR software is available at www.datair.com or by calling (630) 325-2600.
